

SCHOOL INFORMATION PACK

China Quest Structured International Learning Programme

A structured educational journey through China for schools seeking cultural depth, real-world learning, and meaningful student outcomes.

What is China Quest?

China Quest helps students explore China through culture, technology, and real-world experience — with reflection, discussion, and meaningful outcomes built in.

Each day follows a structured learning cycle: Exploration → Reflection → Challenge → Circle. This daily rhythm ensures students do more than visit places — they learn through them.

AGES 14–18	GROUP SIZE 10–30 students
FORMAT Summer / TY / Custom	SUPERVISION 1:8 leader-to-student ratio
DURATION 5–14 days (modular)	STARTING FROM €2,990 per student (5-day module)

Three Learning Pillars

Pillar	Focus
Evidence-Based Learning	Guided observation, discussion, reflection, and documented outputs
Authentic Cultural Immersion	Neighbourhoods, daily life, meaningful human interaction — beyond the tourist gaze
Next-Gen Innovation	Robotics, AI, mobility, innovation ecosystems — connecting interests with future pathways

Daily Learning Cycle

Step	Description
1. Exploration	Site visits, cultural encounters, and expert-led observation in real places

2. Reflection	Guided journaling and discussion to process what students have seen and learned
3. Challenge	Tasks that invite students to interview, observe, sketch, document, and think critically
4. Circle	A shared end-of-day debrief where students exchange insights, questions, and perspectives

Four Core Modules Across Modern China

Each city module offers a distinct lens on China. Core modules are typically 5 days and can be combined into longer programmes tailored to your school.

Beijing

Roots, Identity, and Living Heritage

Great Wall, imperial landmarks, and the continuity of Chinese civilisation. Hutong observation, calligraphy, and everyday cultural practice.

A module focused on how history, memory, and identity shape modern China.

Shanghai

Global Interface, Exchange, and Modern Chinese Identity

The Bund, Pudong, and the story of urban transformation. School exchange, peer dialogue, and neighbourhood discovery.

A module focused on global connection, cultural fusion, and city life in contemporary China.

Shenzhen

Future Ecosystems, Innovation, and STEM Exploration

Technology ecosystems, robotics, and hands-on innovation exposure. Smart mobility, urban change, and future city systems.

A module focused on how design, making, and innovation shape the world students are growing into.

Hong Kong

Capstone Perspective, Sustainability, and Global Outlook

Harbour, density, and East–West urban histories. Field-based sustainability learning and local community observation.

A module focused on comparison, reflection, and bringing the wider journey into sharper perspective.

Additional city modules (Hangzhou, Chengdu, Xi'an) are available on request for schools seeking a broader or more tailored programme.

Sample 5-Day Beijing Module

This is an indicative itinerary. All programmes are co-designed with the school and can be adjusted.

Day	Theme	Core Activities
Day 1	Arrival & Orientation	Airport pickup, hotel check-in, neighbourhood walk, team briefing, welcome dinner
Day 2	Imperial History	Great Wall (Mutianyu), Forbidden City, guided historical context, evening reflection
Day 3	Culture & Craft	Hutong exploration, calligraphy workshop, local family cooking experience, peer circle
Day 4	Innovation & Future	University campus visit (Tsinghua/PKU), tech park, student innovation challenge
Day 5	Reflection & Departure	Morning reflection session, group showcase, certificate ceremony, farewell lunch, departure

Each day follows the Daily Learning Cycle: Exploration → Reflection → Challenge → Circle. Arrival and departure days include lighter activities to support student comfort and transition.

STUDENT OUTCOMES

What Students Gain

Students return with more than memories — they gain confidence, perspective, and evidence of meaningful learning.

Tangible Learning Evidence

Students return with documented observations, reflective journals, creative outputs, and a certificate of completion that can support TY portfolio work. Depending on the module, students may also produce interview notes, short research tasks, visual documentation, or digital storytelling work.

Global Fluency & Core Competencies

Through teamwork, reflection, and cross-cultural engagement, students strengthen adaptability, communication, collaboration, and critical thinking. The programme helps students move beyond passive observation and develop the confidence to interpret, question, and respond to unfamiliar environments.

Career & Future Pathways

Exposure to innovation, urban change, and professional environments helps students connect academic interests with future possibilities. From technology ecosystems to cultural institutions and university settings, students gain first-hand insight into the worlds they may one day study in, work in, or help shape.

Tangible Outputs

Output	Description
Reflection Journal	Daily structured reflections documented throughout the programme
Creative Outputs	Photography, sketches, writing, or digital work produced during challenges
TY Portfolio Evidence	Structured tasks and documentation suitable for TY portfolio submission

Supporting Student Wellbeing

China Quest is designed to support student wellbeing, clear supervision, and practical collaboration with schools throughout the journey.

Clear Supervision

Students are supported by experienced bilingual leaders, with clear group supervision and structured daily coordination throughout the programme.

Risk-Aware Planning

Programmes are delivered with risk awareness built in — including route planning, activity review, emergency response procedures, and clear communication protocols.

School-Facing Support

Schools are welcome to nominate a teacher to accompany the group, helping strengthen continuity, pastoral support, and alignment with school expectations.

Student Wellbeing

Accommodation, transport, meals, and day-to-day logistics are planned to support student comfort and safety. Insurance cover, access to medical support, and clear communication procedures are built into programme planning.

What's Included

✓ Included

- All accommodation (hotel, twin/triple)
- All meals (breakfast, lunch, dinner)
- All domestic transport in China
- All entry fees & activity costs
- International travel & health insurance
- 24/7 bilingual support team
- Learning materials & journal

✗ Not Included

- International flights
- China visa application fees
- Personal spending money

- Certificate of completion

NEXT STEPS

How to Get Started

Step	What Happens
1. Initial Enquiry	Get in touch via email or the website form. We'll arrange an introductory call.
2. Discovery Call	A 20-minute conversation to understand your school's goals, student group, and schedule.
3. Programme Proposal	We prepare a tailored proposal with recommended modules, itinerary, and pricing.
4. Confirmation	Once approved, we finalise dates, logistics, and pre-departure preparation.
5. Pre-Departure	Briefing materials, student/parent information packs, and final logistics coordination.

Ready to Explore?

We'd love to hear from your school.
